

European Peace Action forum

All of the programme will be at **Norra Skolgatan 10**, except **The Growing Influence of NATO and the Militarisation of EU** that will be in **Folkets hus Nobeltorget, Sal 1**.

The general format of the EPA forum is that each "strand" or theme will start with an introduction to the issues in that theme. This will usually be one speaker followed by a short question and answer session and will last around 30 minutes. Following this, we will divide into the smaller workshops. These may have one or two people giving a more detailed introduction to the specific area, or feedback on existing campaigns, but will be mainly an interactive discussion rather than a presentation. The workshops will all have a focus on practical outcomes and what we can do to achieve change in their area.

The final strand, on Sunday 21 September, will not have the introductory speaker in the same way, since this strand is trying to draw together the outcomes of all the previous workshops and work out and implement practical ways forward, both on specific ideas and in terms of establishing better networks.

The Militarisation of Space

Space in an integral part of modern war fighting. From the US "missile defence" system, to unmanned aerial vehicles to satellite surveillance to basic communications, modern, high-tech militaries rely on their space capabilities. Introduction by Bruce Gagnon, Coordinator for Global Network Against Nuclear Power and Weapons in Space.

Workshop: Resistance Against US Missile Offence Installations in Europe

The US "star wars" missile system requires both radar and missile bases in Europe.

This workshop will look at the new bases being built in Poland, the Czech Republic and Hungary and the resistance to them. It will also look at the role of existing bases (such as Menwith Hill in the UK).

Resource persons:

Jan Tamas, spokesman for the No to Bases initiative against a US radar base in the Czech Republic

Sunday 21 September

09.30-12.30

Co-ordinating our Resistance

The driving force behind the EPAf has been a desire, expressed frequently whenever anti-militarist activists from more than one place gather, for us to be able to coordinate our activities better (when appropriate), to support each other better, to have better contacts and communications and so to be more effective.

While the early part of the forum has focussed on specific areas, this final session will try to draw everything together and map a way forward to build on the contacts established during the forum.

We will probably split down into workshops along the following lines, although much of this session will be dictated by what the people present want to achieve.

Ofog will introduce and coordinate.

Workshop: Coordinated Action

How can we co-ordinate decentralised actions, spread information about actions to come, documentation and spreading information about actions done?

Workshop: Information Sharing - How EPA will Share Info Within the Network

How can we make the information and knowledge within our groups available to others around Europe in the most effective way? How we can make and run a database with all the information EPA will cover, and also information about action methods? How we can share information and contacts so that several groups/person don't do the same work? How will communications work within the EPA network?

Workshop: The Next European Peace Action Forum

Do we want another European Peace Action Forum? If so when, who will host it, how will it be organised, what do we want it to achieve?

Workshop: Practical skills for direct action

This session will be an opportunity to share skills, learn new techniques and learn from each other others experience.
